Re: The Real Solution to Our U.S. Immigration Problems – Not One, But 327 Million Walls!

Thank you for your time to review and consider this practical Immigration Reform proposal.

This letter will be delivered next Tuesday April 3<sup>rd</sup> to the offices of the Congressional members listed above. And to the other people and entities noted starting next week via email. It has already been posted on the Internet since it is written to and intended for our citizens to review and consider.

As you will read this prudent and practical solution will among other things have a direct impact upon the 2020 US Census.

My problem-solving background and countless talks with people on these issues, tells me that the majority our citizens will find this Immigration Reform proposal acceptable. Primarily because it will actually solve the related problems.

This proposal provides a real solution to our nation's broken immigration and population control systems. It is a prudent and practical comprehensive reform of US Immigration Control and American Population Management. One could write a book of such topics, but the essence of our solution to this long-standing national problem is herein reduced to a few detailed pages.

To be clear, this proposal addresses our overall immigration and population management issues. The current DACA problem is only considered as a side issue, but will be finally dealt with herein.

I believe President Trump could support this approach to confronting the immigration crisis. And that the US Congress could quickly legislate it into law. Well over 60% of American citizens will support this balanced and comprehensive approach. Of course, there will be some individuals and groups within our nation that consider the approach too tough in some ways. However, in a nation of 327,000,000 citizens not even the most obvious and prudent solutions will please everyone.

America must be able to control our own borders and decide who may come in, who may stay, who must go, and who we grant US Citizenship and the Right to Vote. US Citizenship cannot be given to those that do not rightfully deserve it. No matter how sad their story is! It only cheapens our own citizenship. Anyone that has of their own free will, illegally crossed our nation borders by land, sea or air – intentionally going around our legal immigration procedures – is not “entitled” to US Citizenship. Period!

It is easily observed that the immigration and DACA legislative proposals produced by the House and Senate, or better named the Republican or Democrat plans are not playing very well. Mainly because they fix nothing! Frankly none of them have any chance of actually providing our nation with a viable immigration control and population management system. Their approaches will only put a few more Band-Aids on a national open wound and once again kick the mess down the road as they have for the last 30 years.

So, what can we do to finally solve this long-standing national problem?

The odd thing is that most other countries in the world large or small, developed or under-developed do control their borders, illegal entry, and illegal over-stays. So how is that? Something must be missing in our broken population management system. What could it be?

### The National Missing Link

What is missing very simply is any control over who is in our nation. We do not even have a reasonable estimate of how many people are in our own country – citizen or not! We currently have no way of keeping anyone from entering our nation and simply not leaving! Whether they entered via plane with a valid visa, or walked across the Southern border at midnight. Therefore, we must prudently do what in the past we have frankly been a bit paranoid of and just too lazy to do. What now surely only makes *common sense*. Yet, not one politician or anyone else has even mentioned it over the last year.

The applicable expression I use is, “*There is no control like no control*”. So, then how will we control it?

While this may not be the perfect example, it makes the point. Imagine you manage a gargantuan and busy warehouse with a rolling inventory of some 327,000,000 parts. You are “fairly” sure what parts you have in stock overall, but you cannot be certain. Further, there are other parts that keep getting received into the warehouse and only serve to further confuse the issue. The simple reason for the on-going mass confusion is that none of these hundreds of

millions of parts have an inventory control number. No unique part numbers. They all do have a part name, but no number. Thus, there can only be chaos and the accumulation of parts that do not properly belong in the warehouse in the first place! So, there it is. That my fellow Americans, is the state of our current American Population Management and US Immigration Systems. *Chaos, by any other name is still Chaos!*

Now we all know the simple key to solving our immigration and population management problems.

o o o o

The missing link, and absolute base requirement to reform our broken national population management system – is a unique identification code or number for every man, woman, and child that is in our nation – citizen or not. Meaning that all of our 327,000,000 US citizens, over the next few years (before the end of 2020 hopefully), will register and receive a unique US Citizen Identification Code or Number. Additionally, “everyone” else in within our borders e.g., students, tourists, Green Card holders, permanent resident aliens, business people, diplomats, etc., will be required to have a unique Occupant tracking code or number. The two (2) systems will be designed to complement each other and could be named the National Citizen and Occupant Identification System or NCOIS. For example, when someone legally completes the multi-year process of becoming a US citizen and is sworn in, they will be added to the Citizen system and removed from the Occupant system.

Currently, there are approximately 327,000,000 US citizens and only we would populate the Citizen System. Someone is a proper US citizen or they are not!

Legal Occupants (L/O) e.g., foreign students, Green Card holder, DACA, guest workers, even tourists would be the first to populate the Occupant System.

Further, the actual count of Illegal Occupants (I/O) is a complete mystery! Various estimates are 15 to 20 million or more, but again no one really knows... My expectation is that once this national registration is completed the American public well be both shocked and disgusted with the I/O count and the breakouts it is comprised of.

Based upon my career experience in designing, developing, and implementing computer systems, the proposed NCOIS project implementation will be a bit tedious, but will be rather straightforward. Several other developed countries utilize such these systems, which we can use as practical models. We are reinventing the wheel and this is not rocket science, folks!

How to pay for it?? Timing as they say, is everything. Very fortunately considering our Federal budget and annual deficit problems, we could conduct the tedious implementation of the NCOIS over the next three (3) years, instead of conducting the upcoming and equally tedious 2020 US Census! It will yield far more accurate counts and other data than the Census process ever has. Further, the on-going maintenance of the NCOIS will eliminate the need for the 2030 Census and all others.

Once this population management system is in place it will provide accurate and up-to-date citizen and occupant data that the once every 10-year Census process has ever been able to yield.

As a result, instead of having just one (1) Wall along the US /Mexico border, we will factually have some 327,000,000 Walls! And another xx-millions of Walls for anyone else in our country because they will be registered in the Occupant System. We will be able to identify anyone else that is here legally and be rid of those we decide should not be here.

I believe that President Trump would approve of this national, all borders covered population control system. It will be our best tool to keep the border violators and the bad guys out. Further, additional billions of budget dollars will not be needed build and maintain the Southern Border Wall. There is a more practical way of addressing the Southern Border issues that will be presented.

Law enforcement should and will then be able to verify who someone is just by asking to see their National ID Card (NIDC). And to those who will start screaming about privacy and security and the old “1984 Big Brother” rhetoric – just get over it! If anyone can write down a different approach that answers our related problems as well as this does, then please do and present to the public. Otherwise, make your comments known and then be quiet while the rest of us attend to the nation’s population control problems once and for all!

In case you are wondering, my background is 30-plus years in the Information Technology Industry. Working mainly in Washington, DC for both corporate and Federal agencies designing and implementing computer systems. And for several of those years I worked as a consultant for what was then called the US Immigration and Naturalization Service.

o o o o

## **The Functional Points of this Project Implementation**

So then, how will this work?

- First, stabilize the Southern Border.
  - President Trump would order, for example, some x-thousands US troops currently stationed abroad (and in country) to be recalled and assigned to guard the US/Mexico Border 24/7. This will not be another improper drafting of the National Guard for foreign defense purposes! This staffing could be in place and covering the border in 2018. Frankly, many (not saying all) of them are not doing anything of importance at those foreign locations anyway. Blunt, but the truth!
  - Federal military personnel can legally be used for this national Defense purpose along our national borders. Preventing more I/Os, gang members, and drug traffickers from entering. Technically each involved state's Governor must ask and grant permission for Federal troops to be used in their respective state. You never know, this military force may actually help stop the constant flow of heroin across the US/ Mexico border! Wouldn't that be nice?
  - This could well become part of a permanent a guard function. With the Army used for part or most of the border security, it would reduce the need and cost of thousands of more Border Guards. Funds that could be directed elsewhere.
  
- Suspend the 14<sup>th</sup> Amendment to the US Constitution – the root cause of the DACA problems.

The **14th Amendment** to the Constitution was ratified on July 9, 1868, and granted citizenship to “**all persons born or naturalized in the United States,**” which included former slaves recently freed.

### **AMENDMENT XIV to the US Constitution – Exact Wording**

SECTION 1. All persons **born** or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

- The President and/or the US Congress will act to suspend the 14<sup>th</sup> Amendment to the US Constitution! Specifically, the “born” provision therein.
- Actually, simply removing the words “**born or**” from the current wording would do a lot in closing the door. It is not 1868 anymore folks. The real immigration needs of our nation have and will continue to change, and most likely be reduced as we travel through the rest of this environmentally difficult century.
- That is the huge loophole in the 14<sup>th</sup> Amendment that has allowed countless of babies to be born in the US by mothers that premeditatedly entered our nation illegally. For some 32 years, of their own free will they violated our national sovereignty in order to have their child born on US soil. The 14<sup>th</sup> Amendment automatically gives the

- newborn baby US citizenship and is the mother's (and father's if he came along) ticket to stay in America. A flat violation of the Amendment's intent and spirit.
- Closing that much abused immigration loophole will disturb some people or groups, but it is terribly realistic! You cannot clean up a flooded basement if you don't stop more water from coming in, can you?
  - Even consider making that suspension "retro-active" to 12-31-2016 or possibly 12-31-2015. Any I/O children born in that period would have their US citizenship status revoked and the mother, child, and father if he is present will be deported back to their country of origin. Otherwise, those babies will lead to more DACA issues years from now. We must act in order to permanently stop the leak.
  - Again, it is a pre-meditated action and clear violation of the spirit and intent of the 14<sup>th</sup> Amendment. When a person intentionally goes around the US immigration process and steals across our border or enters via sea or air in order to deliver her baby on US soil. These children are referred to as "border babies" or "anchor babies". Some don't like those labels, but they are accurate.
  - The US House and Senate would then rapidly pass a new Amendment to replace the 14<sup>th</sup> Amendment with language that will prevent such occurrences in the future. The Congress has the total ability to pass legislation in 24 to 48 hours "IF" they really want to. Then, send the passed legislation to the states for ratification.
- We could rationally consider suspending most if not all legal Immigration into the US for up to three (3) years or through 12-31-2020 anyway.
    - If we finally decide (which we probably will) to allow the 800,000 to 1.8 million (no one really knows how many) DACAS to stay it only makes sense to stop the normal flow of all legal immigration while we are conducting our national housekeeping!
    - Of course, not business travelers, tourists, students, etc. However, we currently allow about one (1) million people to legally immigrate into the US each year! Many Americans do not know that! If we are going to allow x-number of DACA people to remain we could balance that by stopping the legal flow for a reasonable span of time. Legal immigration can always be opened up again, once things are under control.
    - You may think me anti-immigrant which I am not. However, I am from the schools of "enough is enough" and "turning chaos into order". I favor legal and controlled immigration, only. What a concept! The Immigrant Nation must put up the "Sorry we are full" sign...
    - Finally, one of the world's greatest and growing problems is over-population. A hot topic that no one ever seems to want to talk about in public! Especially politicians. However, going forward every nation must become responsible for its own people. Our immigrant friendly nation in recent years has become a dumping ground for certain nations to be rid of their excess population. For example, it has been estimated that we have some 10% of Mexico's population. Before the Internet was created the Mexican government used to hand out instructions on how their people could enter the US and just blend in. Believe it! Then, the I/O's make money here and send it back to home rather than spending it in our economy!

- We will implement a strict set of entry guidelines based primarily on needed skills, knowledge of our language, and a clear background check. Before entry. You know legal, controlled immigration. Again, what a concept!

### **What to do about the DACA problem?**

First let's review the "DACA Cycle" for the purpose of shared understanding. Not implying acceptance or that some people will like the truth being explained for all to know.

- First, a pregnant woman (and possibly the father) enters the US illegally and often into their respective ethnic community; possibly with friends or other family members from their country already living here legally or not. While obviously the vast majority of such I/Os are Latino everyone must understand that such border violators arrive at our international airports from all over the world all the time. The people working at Dulles airport outside of Washington, DC told me about the flow a people coming in on international flights with a one-way ticket and numerous heavily packed suitcases. They do come from everywhere, with no intention of ever leaving if they can avoid it.
- Of course, in a matter of months the baby is born, claims US citizenship, and mom and maybe dad then get to stay with their "border baby".
- Eventually, the second part of the parent's pre-meditated "US border violation plan" comes into play. This I/O plan has been unfolding for the last 32 years. Since Ronald Reagan's "one-time" Immigration Reform and Control Act of 1986 was passed. After they have been in the US for "a while" and sometimes even have had another child, they decide to send for the one or more children they left behind in their home country with family or friends for x-years. Once those children have successfully violated our borders the family, that they deliberately broke up for several years, is reunited and they maintain a low profile.
- When the child turns 21-years old he or she can apply for Green cards for the parents, but not the other siblings.

That my fellow Americans is the "DACA Cycle".

Next, Chain Migration abuse of our borders begins. Bringing other family members e.g., grandparents, aunts, uncles, cousins, etc. into the US to stay. Again, that is deliberate national immigration abuse, it must come to an end, and soon!

Each mother and baby make two (2). If the father is along make that three (3). Then, potentially added some other children from their country of origin. Those are the DACA I/Os. The estimated number of them has grown in recent months from 800,000 to 1.2 million and now to 1.8 million. Again, no one really knows how many there are!

That's today folks and there are more are in the pipeline if we do not put an end to this pre-meditated national invasion and border violations from all over the world.

Consider that the pollsters say that 87% of Americans when asked want the DACA's to be allowed to stay here with their families. Amnesty does not mean citizenship! But, they don't ask the next question. Do you wish the mother had never crossed our border illegally in the first place? There it is...

### **How to Manage the US Citizen Population and the Others**

I will not go into all the existing or potential breakouts or categories, but the following will address much of the issue and hopefully cause a lively national debate. Which is exactly what We the People need to have right now! We have had more than enough of this border abuse.

#### **National Citizen System**

US Citizen – either native born or legally naturalized. And, only citizens.

#### **National Occupant System**

The Occupant System will be used to track all non-citizens **legally** in our nation, such as:

- PRA or Permanent Resident Alien – You may not know about this, but these are people that legally immigrate and live much of their life here with no declared interest in ever obtaining US Citizenship. They maintain citizenship in their country of origin. It is a standard option. They cannot vote in our elections!
- Foreign Students
- Guest Worker Program
- Green Card holders
- Business travelers
- Tourists – the airlines will scream and fight this because it will take more time to load and unload a given flight. National security has never been the airlines highest priority.
- Others...

Of course, the Occupant System will also track those that are here **illegally**. Many of which are in the process of determining whether they will be allowed to stay. This grouping could include:

- DACA persons while they are in the process of being cleared to stay here or be deported.
- An unknown number of other border violators that are here and should not be. Everyone will be identified.
- Criminals of foreign birth e.g., drug traffickers, MS13, etc. Such persons when identified will go to jail to be sorted out. Then they will be deported, put in prison or simply executed! The Death Penalty will be used as appropriate and I guarantee you the public will support it. Guaranteed!

As a side note, there are some countries that we do not have a “return” policy with – a reciprocity agreement. Even for criminals. This is a reason why some criminals land in our prisons for

years at the taxpayers' expense. My thought is that they came here illegally, therefore they do not need to be returned legally! We are just returning some lost citizens. Just my view.

My recommendation is that with the exception of known criminals that will be dealt with – the DACA persons of any age and the other border violators, should “initially” ALL be placed under a URA or Un-Authorized Resident Alien immigration status.

They will remain in the URA status until their case is fully resolved. If they are not deported at the end of that review they would then be moved into a permanent ARA or Authorized Resident Alien immigration status. They should not be granted US citizenship.

o o o o

### **About Protecting US Citizenship**

Citizenship in Our nation will not be given away cheaply or to people that have intentionally violated US borders and immigration laws. Frankly, it cheapens our US citizenship and the Right to Vote. The vast majority of US citizens agree with that position.

Those in the DACA process must never be granted US citizenship. They should be thankful if allowed to remain here and be happy to become legal Authorized Resident Aliens. We do not “owe” them anything. We are granting those who violated every part of proper naturalization process the privilege of living in OUR nation. If that generous result is not good enough for some of them, they certainly know where the border or the airports are!

Again, in 1986 a supposedly “one-time” amnesty was granted under President Ronald Reagan. He stated at the signing that the government would then get tough of employers hiring illegals. What a blatant joke and lie that was!

Further, the Reform Act was only supposed to grant citizenship for about 1.5 million I/Os. It ended with closer to three (3) million coming in and many with false documents they purchased on the street.

Over the last 32 years, people from all over the world have of their own freewill, entered our nation with no intention of leaving. Some, but not all of those have had babies in order to take advantage of the 14<sup>th</sup> Amendment.

Over the last 32 years, every President and every US Congress regardless of political party have paid lip service to stopping the illegal flow. Various lobbyists and pro-immigrant groups coach members of Congress to leave things just the way they are. Some want cheap labor, some want future voters, and too many just want people to fill-up their rental units! Think about it.

Now a portion of the I/Os with the cover of DACA are abusing our nation's basic Christian ethic and are blatantly playing the “family re-unification card” on us. Of course, if dear old mom would have stayed in her own country in the first place, we would not have this problem, today would we?

This chaos will only end if We the People say “enough is much more than enough”. And back it up this time.

Thank you for your time in reviewing this sincere proposal.

If discussion on this Immigration Reform plan is of interest please contact me at 410-443-9608 and/or [contacts@commonsense2nd.com](mailto:contacts@commonsense2nd.com).

o o o o

If additional copies of this proposal are needed, refer to [www.common sense2nd.com](http://www.common sense2nd.com) Tab down on the Home Page until you see the Green Box that is titled, *The Solution to Our U.S. Immigration Problems – Not One, But 327 Million Walls!* There is a link in that box to a PDF of this proposal.

Admittedly, I do not agree with the President on various issues. However, we Americans regardless of any political differences must work together in order solve our common problems.

I write for the Common Good of my fellow American Citizens, the preservation of our American Democracy, and the domestic and foreign security of the United States of America.

Respectfully,

A J Wildman,  
The Independent Party of America
