

**Our Common Patriotic Challenge & Duty at the Polls
on November 6, 2018 and Beyond**

First, and most important of all I ask you to get out and vote that day. If you are not yet registered to vote. THEN, GET REGISTERED!! There is still time in most states.

We the People, have a truly stern choice that day, but hard situations Demand hard action.

This my frustrated fellow Americans is our true politically Independent action plan!

1. Overall, the Republican Party has destroyed what little was left of itself since Trump took office. They now more than ever blatantly serve the Wealthy and certain Big Industries. And it is truly obvious their main job is to get re-elected no matter who they need to walk-over and take money from. Our Common Good to them is a joke.
2. Overall, the Democratic Party does not have any platform or a plan that serves the Common Good of We the People – the citizens of America. They have sold out the average America be they white, black, brown, etc., in order to cater to whatever groups are screaming and whining the most. They are at least intending to do right for the Common Good, but are failing miserably. And Congressional leaders will not stand up to the Republicans or Trump.
3. Thus, We the People will vote out or against every Republican candidate running for any office including US Senator, US Representative, State Governor, and those running for State level Congresses, as well. All incumbent Republicans must be voted from office. The Republican Party must practically be crushed at the polls in 2018 and we will finish the job in November 2020!

It is a practical, political necessity. Both Parties are functionally broken to our Common Good. By our votes in 2018 and 2020 we will deliberately repair our Democracy.

4. Thus, we will vote into office this November 6st a new (non-incumbent) Democrat whenever possible. But, if there is a viable Independent candidate (not a nut case!) they should be voted in over a Democrat.
5. Those deliberate voting actions will result in a Democratic majority in both House and Senate. And a greater number of Independents in Congress than ever before. The rise of a true Third party that will replace the Republican as a major party in 2020.
6. Those deliberate voting actions will also tell the clueless Democratic leadership that their pathetic catering to every whining minority group must come to an end. They must hold every citizen responsible for themselves and defend the Common Good of our citizens before all others. Or it will be their end!
7. I cannot go into the platform presented on this website now. It speaks for itself. But, let me nail one urgent issue. Immigration! Many will not like this, and frankly I do not like needing to write it. But, it is absolutely true. If we do not grasp the Big Picture we will all suffer from its harsh reality. Prepare to broaden your perspective on the world...

We must do the following (and more) as soon as possible:

- Freeze all immigration into America for at least three (3) years, including legal. This includes ending all refugee entry from south of the US/Mexico border. No exceptions.
- Must conduct a National Registration of all walking on our soil.
- We will have a National Citizen ID like almost every other country in the world has.
- All non-citizens will be identified and we determine who stays and who goes. Period.
- My fellow Americans two (2) things are happening that if we do not address then NOW, will result in chaos beyond are belief. The first, is over-population. The second, is sea level rise. No matter what someone wants to call it the water is and will rise.
- Before 2100, for example, at least half of Florida will be under water. Guaranteed.
- Before 2100, tens of millions of Americans will need to be relocated because of rising water and repeated flooding in residential areas.
- Bangladesh, on the eastern border an India has over 166,000,000 million people and most of their nation will be flooded out long before 2100 and they are not welcome in India!
- We must control, protect, and plan to support our own population.
- We must Demand that all other nations take care of their own people, including Honduras. We cannot and will no longer be a population dumping ground for the rest of the world. And the Democratic Party had better wake up to that reality right NOW!
- Between now and the 2020 Presidential Election the American Agenda platform on this website needs become a national talking point. Independent and Democrat candidates must step up and bring these Common Good policies and legislation to the voters.
- The national embarrassment and disaster that is the Trump administration will be gone by 2020, if not sooner!
- We the People, will elect a new Independent or Democratic President in November 2020. America will again lead the World with prudent and practical policies.
- Governments, the Wealthy and Big Industries in America and around the world be brought to civil order and responsibility.
- Population and Sea Level issues must be practically confronted pro-actively NOW, for the good us still living today and those that must live with what we leave behind.

A J Wildman
